

THE FUTURE OF FIRE-RATED GLASS: PYROGUARD ADVANCE

FUTURE-PROOF YOUR PROJECTS

- ✓ **CERTIFIED FIRE PERFORMANCE**
Tested and approved fire-resistant glazing solutions.
- ✓ **MODERN AESTHETIC APPEAL**
Slim profiles and clear visibility.
- ✓ **EASY FABRICATION**
Designed for efficient processing and installation.
- ✓ **VERSATILE APPLICATIONS**
Suitable for doors, screens, and internal partitions.
- ✓ **TRUSTED PROTECTION**
Helping create safer buildings without compromising design.

FIRE-RESISTANT GLAZING. SMARTER PROTECTION.

CERTIFIED PROTECTION • SLIM PROFILES • PROVEN PERFORMANCE

Pyroguard Advance delivers certified fire-resistant glazing solutions designed for modern fire door systems, internal screens, and partitions. Combining optical clarity with tested fire performance, the range supports safe, compliant, and visually clean installations.

ADVANCE 2-EW30/7-1

Slimline
30-Minute Protection

Designed for everyday fire door applications requiring EW30 fire resistance.

EW30 Classification

30 minutes integrity & radiant heat control

7mm Profile

Lightweight & discreet

SUITABLE FOR:

Timber & steel fire doors

BENEFITS:

- > Slim profile
- > Clear visibility
- > Efficient installation

ADVANCE 2-EW30/8-1

Enhanced
30-Minute Protection

A robust 8mm EW30 glazing option for fire-rated systems requiring enhanced performance.

EW30 Classification

30 minutes integrity & radiant heat control

8mm Profile

Increased durability

SUITABLE FOR:

Fire doors & internal glazing

BENEFITS:

- > Stronger build
- > Clean appearance
- > Certified protection

ADVANCE 2-EW60/11-2

Higher Performance
60-Minute Protection

Designed for applications requiring up to 60 minutes fire resistance.

EW60 Classification

60 minutes integrity & radiant heat control

11mm Construction

Enhanced fire performance

SUITABLE FOR:

Higher-risk fire-rated systems

BENEFITS:

- > Longer fire resistance
- > Robust construction
- > High clarity
